

Deadline of Submission of Comments: 30-Jan-23
Document Number: ANSI/ASB Std 145
Document Title: Standard for Consultation during Friction Ridge Examination

Note: a specific Proposed Resolution must accompany each comment or it cannot be considered.

#	Section	Type of Comment (E-Editorial, T-Technical)	Comments	Proposed Resolution	Editor or Working Group Review	Final Resolution
1	3	E	The word "consultant" should be defined so that labs have a clear understanding of who can and cannot be a consultant.	Define "consultant" and explain minimum qualifications.	Section 4.3 specifies the consultation is with another examiner and 3.5 defines examiner.	Reject: Section 4.3 specifies the consultation is with another examiner and 3.5 defines examiner.
2	4.3	T	I don't believe that consulting for the reasons listed as 4.3 a-g needs to be documented because the analyst is responsible for their own conclusions, it doesn't matter if they consulted with someone or not. The 'standard' is unnecessarily burdensome and not effective or efficient.		No proposed resolution.	Reject, no alternative provided.
