ASB Standard 146, Standard for Resolving Commingled Remains in Forensic Anthropology

#	Section	Type of Comment (E-Editorial, T-Technical)	Comments	Proposed Resolution	Final Resolution
1	6	T	The reporting section specifies by the rules and requirements for an agency or institution. What if institutions have no policies about this material (e.g. Universities). What about individual practitioners not attached to an agency or institution? This should also be clarified to be more inclusive of different situations.	Add a bit more language about how notes/records should be kept, especially if by a sole practitioner, or someone that is at an institution but there are no policies. I understand that another doc will be built, but this one shouldn't suffer the wait.	Accept with modification: this section was updated to read "All raw data, techniques, and interpretations shall be documented. Documentation should allow for an independent examiner to assess the approach to resolving commingled remains."
