#### Foreword

This document was developed to provide minimum requirements for the qualifications and development of forensic toxicology laboratory personnel and individuals performing evidentiary breath alcohol instrument calibration. Thus, when "laboratory" is used in this document, it is implied that both forensic toxicology testing and calibration laboratories should be included.

Defining appropriate educational requirements is important when evaluating prospective employees to work in a laboratory. This ensures they have a solid foundation that can be further enhanced through a robust training program. Training includes evaluation of competency as the trainee progresses through the program. After completing a training program, personnel continue to learn, remain current on relevant topics, and stay engaged through professional development activities. Certification of laboratory personnel provides an avenue for external evaluation of the person's knowledge and training.

The American Academy of Forensic Sciences established the Academy Standards Board (ASB) in 2015 with a vision of safeguarding Justice, Integrity, and Fairness through Consensus Based American National Standards. To that end, the ASB develops consensus based forensic standards within a framework accredited by the American National Standards Institute (ANSI), and provides training to support those standards. ASB values integrity, scientific rigor, openness, due process, collaboration, excellence, diversity, and inclusion. ASB is dedicated to developing and making freely accessible the highest quality documentary forensic science consensus Standards, Guidelines, Best Practices, and Technical Reports in a wide range of forensic science disciplines as a service to forensic practitioners and the legal system.

This document was revised, prepared, and finalized as a standard by the Toxicology Consensus Body of the AAFS Standards Board. The draft of this standard was developed by the Forensic Toxicology Subcommittee of the Organization of Scientific Area Committees (OSAC) for Forensic Science.

Questions, comments, and suggestions for improving this document can be sent to the AAFS-ASB Secretariat at asb@aafs.org or 410 N 21st Street, Colorado Springs, CO 80904.

All hyperlinks and web addresses shown in this document are current as of the publication date of this standard.

ASB procedures are publicly available, free of cost, at <a href="https://www.aafs.org/academy-standards-board">www.aafs.org/academy-standards-board</a>.

**Keywords:** forensic toxicology, personnel requirements, training, continuing education, professional development, certification, breath alcohol instrument calibration

### Table of Contents (to be updated when the document is finalized)

#### Standard for Education, Training, Continuing Education, and Certification of Forensic Toxicology Laboratory Personnel

#### **3 1 Scope**

- 4 This document provides minimum requirements for educational qualifications, training,
- 5 competency, experience, continuing education, and certification of laboratory personnel performing,
- 6 interpreting, or overseeing forensic toxicology analyses or evidentiary breath alcohol instrument
- 7 calibrations. It applies to the following sub-disciplines: postmortem toxicology, human performance
- 8 toxicology (e.g., drug-facilitated crimes and driving-under-the-influence of alcohol or drugs), non-
- 9 regulated employment drug testing, and other forensic testing (e.g., court-ordered toxicology,
- general forensic toxicology). The following are outside the scope of this document: personnel who
- exclusively perform administrative or non-technical duties; individuals working as breath alcohol
- 12 instrument operators; individuals performing calibration adjustments to breath alcohol
- instruments; or individuals who solely perform instrument maintenance activities.

#### 14 2 Normative References

- 15 The following references are indispensable for applying this standard. For dated references, only the
- edition cited applies. For undated references, the document's latest edition (including any
- 17 amendments) applies.
- 18 ANSI/ASB Standard 017, Standard for Metrological Traceability in Forensic Toxicologya
- 19 ANSI/ASB Standard 036, Standard Practices for Method Validation in Forensic Toxicologya
- 20 ANSI/ASB Best Practice Recommendation 037, *Guidelines for Opinions and Testimony in Forensic*
- 21 Toxicology<sup>a</sup>
- 22 ANSI/ASB Standard 053, Standard for Reporting in Forensic Toxicology<sup>a</sup>
- 23 ANSI/ASB Standard 054, Standard for a Quality Control Program in Forensic Toxicology Laboratoriesa
- 24 ANSI/ASB Standard 055, Standard for Breath Alcohol Measuring Instrument Calibration<sup>a</sup>
- 25 ANSI/ASB Standard 056, Standard for Evaluation of Measurement Uncertainty in Forensic Toxicology<sup>a</sup>
- 26 ANSI/ASB Standard 098, Standard for Mass Spectral Analysis in Forensic Toxicology<sup>a</sup>
- 27 ANSI/ASB Standard 113, Standard for Identification Criteria in Forensic Toxicology<sup>a</sup>
- 28 ANSI/ASB Best Practice Recommendation 122, Best Practice Recommendation for Performing Alcohol
- 29 Calculations in Forensic Toxicology<sup>a</sup>

#### 31 3 Terms and Definitions

- 32 For purposes of this document, the following terms and definitions apply. Additional applicable
- 33 terms are defined in ANSI/ASB Technical Report 208, Forensic Toxicology: Terms and Definitions.
- **34 3.1**
- 35 analyst
- 36 Individual, however named, who conducts, directs, or reviews the analysis of forensic toxicology
- 37 samples and/or breath alcohol instrument calibration activities. Analysts evaluate and interpret
- observations and calculations and may sign a report for court or investigative purposes. The analyst
- may testify but does not provide opinions. Duties and responsibilities may include those of a
- 40 technician.
- 41 3.2
- 42 certification
- Procedure by which a third party gives written assurance that a person, product, process, or service
- 44 conforms to specific requirements.
- 45 **3.3**
- 46 **competency**
- 47 Technical skills and knowledge necessary to perform duties successfully.
- 48 **3.4**
- 49 **continuing education**
- 50 **CE**
- Educational activity (e.g., class, lecture series, conference, seminar, or short course) that updates
- 52 participants in their relevant area of knowledge.
- 53 **3.5**
- 54 course
- 55 Program of instruction taught through an accredited college or university program in which an
- official record of the institution documents the student's successful completion.
- 57 **3.6**
- 58 credential
- 59 Formal recognition (e.g., diploma, license) of a professional's knowledge, skills, and abilities.
- 60 3.7
- 61 experience
- 62 Direct observation of and participation in the practice of a discipline.
- 63 **3.8**
- 64 **laboratory personnel**
- 65 Individuals who perform analytical or laboratory-based duties of a technical nature.
- 66 NOTE 1 Laboratory personnel include individuals who perform, interpret, or oversee breath alcohol
- 67 instrument calibration duties
- 68 NOTE 2 Laboratory personnel include consultants who provide factual information, interpretations, and
- opinions related to the results of toxicological tests for court or investigative purposes.

- 70 **3.9**
- 71 professional development
- 72 Education and training that contributes to career advancement and succession planning (e.g.,
- administration, leadership, management, and fiscal responsibility).
- 74 **3.10**
- 75 qualifications
- 76 Combined education, training, and experience of an individual.
- 77 **3.11**
- 78 technician
- 79 Individual, however named, who performs basic analytical duties but does not evaluate and
- 80 interpret observations and calculations. Technicians may also perform instrumentation verification,
- adjustment, and calibration duties. They may be named in reports to indicate their contribution to
- the work.
- 83 **3.12**
- 84 toxicologist
- 85 Individual, however named, who provides factual information, interpretations, and opinions related
- to the results of toxicological tests for court or investigative purposes. Duties and responsibilities
- 87 may also include those of an analyst.
- 88 NOTE May be further defined by role [e.g., toxicologist (general), toxicologist (alcohol), toxicologist (breath
- 89 alcohol calibration)].
- 90 3.13
- 91 toxicology technical leader
- Individual, however named, who is responsible for the technical oversight of the toxicology and/or
- 93 breath alcohol calibration laboratory. Duties and responsibilities may also include those of a
- 94 toxicologist.
- 95 3.14
- 96 training
- 97 Formal, structured teaching and assessment process, through which personnel reach a level of
- 98 scientific knowledge and expertise required to perform specific duties.
- 99 3.15
- 100 training records
- 101 Record used to document employee completion of the training program, continuing education, and
- professional development; maintained separately from other records (e.g., assessments,
- 103 certifications, or discipline-related employment records).
- **4 Minimum Requirements for Personnel**
- 105 4.1 Educational Qualifications
- 106 **4.1.1 General**
- **4.1.1.1** Upon publication of this document, all new hires and internal promotions in laboratories
- adopting this standard should meet the educational requirements specified below.

- 109 **4.1.1.2** Laboratories shall ensure that all current employees meet the educational requirements no
- later than December 31, 2035.
- **4.1.1.3** Official academic transcripts shall be required as proof of credentials, including degree(s)
- awarded.

#### 113 **4.1.2** Technician

- Personnel in Technician positions shall have an Associate's degree or higher in natural science,
- applied science, or technology from an accredited institution. An equivalent number of semester
- hours can be substituted for an Associate's degree.

#### 117 **4.1.3** Analyst

- Personnel in Analyst positions shall have a Bachelor's degree or higher in natural science
- 119 (preference in chemistry, toxicology, biochemistry, pharmacology, or biology) or applied science
- 120 (e.g., forensic science, medical sciences) from an accredited institution and have successfully
- completed general and organic chemistry courses with associated laboratory classes.

#### 122 4.1.4 Toxicologist

- Personnel in Toxicologist positions shall have a Bachelor's degree or higher in natural science
- 124 (preference in chemistry, toxicology, biochemistry, pharmacology, or biology) or applied science
- 125 (e.g., forensic science, medical sciences) from an accredited institution and have successfully
- completed general and organic chemistry courses with associated laboratory classes, at least one (1)
- college-level course from column A, and one (1) 36-hour workshop or college-level course from
- 128 column B located in Annex C.

#### 129 4.1.5 Toxicology Technical Leader

- Personnel in Toxicology Technical Leader positions shall have a Bachelor's degree or higher in
- natural science (preference in chemistry, toxicology, biochemistry, pharmacology, or biology) or
- applied science (e.g., forensic science, medical sciences) from an accredited institution and have
- successfully completed general and organic chemistry courses with associated laboratory classes, at
- least one (1) college-level course from column A, and one (1) 36-hour workshop or college-level
- course from column B located in Annex C.
- NOTE 1: See the additional experience requirement for Toxicology Technical Leaders in 4.2.4.
- NOTE 2: Minimum standards for education are summarized in Annex B for each employment category.
- Applicable scientific topics are listed in Annex C.

#### 139 4.2 Training, Experience, and Competency

#### 140 **4.2.1 General**

- **4.2.1.1** The laboratory shall ensure technical personnel are trained and demonstrate competency
- in each assigned technical duty before being authorized for independent work in that duty. Duties
- may include but are not limited to handling test and calibration items, instrument maintenance,
- preparation of reference material, conducting and reviewing testing/calibration activities,
- evaluating data, reaching conclusions, signing reports, and providing testimony.

- **4.2.1.2** The length of training should consider the scope of work to be performed, as well as the
- individual's qualifications and experience.
- 148 4.2.2 Initial Training
- **4.2.2.1** The laboratory shall have a documented training program addressing the scientific
- 150 knowledge and expertise necessary to perform assigned job duties.
- **4.2.2.2** Training elements shall include the applicable content as summarized in Annex A.
- **4.2.2.3** Training sources may be internal and external to the forensic laboratory. Sources for
- external training may include government agencies, academic institutions, training academies or
- institutions, private sector organizations, manufacturers, and professional societies.
- 155 **4.2.2.4** The training program shall specify:
- objectives that define the specific elements the trainee needs to demonstrate competency from
- 157 Annex A;
- instructor qualifications that include competency and area(s) of expertise for specific training
- elements;
- trainee requirements to include the actions required of the trainee to meet the objectives of the
- training program (e.g., reading of specified literature; minimum number of surrogate test and
- calibration items analyzed)
- 163 required periodic assessments of the trainee (practical, written, or oral) with performance
- metrics to be met (e.g., predetermined grading criteria and passing criteria);
- defined criteria for successful completion of the training program.
- 166 **4.2.2.5** The training program shall be reviewed for relevancy, efficacy, and content at an interval
- established by the laboratory, not to exceed every two years.
- 168 4.2.3 Ongoing Competency
- **4.2.3.1** After an individual assumes independent casework or breath alcohol instrument
- calibrations, ongoing evaluations shall be used to help demonstrate their continued competency.
- **4.2.3.2** To demonstrate ongoing competency of personnel, the laboratory shall:
- define appropriate activities (based on job duties) to monitor the competency of personnel (e.g.,
- participation in proficiency testing, retesting, direct observation);
- 174 establish a predetermined, acceptable level of performance;
- 175 monitor the competency of personnel continuously and document annually;
- establish remediation and corrective action plans when expected outcome(s) are not achieved.

- 177 4.2.4 Experience for Technical Leaders
- 178 Technical Leaders shall have at least three years of experience performing independently as a
- 179 Toxicologist.
- 180 4.3 Continuing Education and Professional Development
- 181 **4.3.1** General
- 182 It is important for laboratory personnel to remain current within the discipline through continuing
- education and professional development activities appropriate for the scope of their job duties.
- 184 4.3.2 Laboratory Responsibilities
- 185 **4.3.2.1** The laboratory shall ensure that the following resources are available and accessible to
- laboratory personnel:
- reference texts in key subject areas (e.g., analytical chemistry, toxicology, pharmacology);
- 188 reference literature containing physical, chemical, pharmaceutical, and/or analytical data;
- 189 relevant periodicals and peer-reviewed journals.
- 4.3.2.2 Laboratory management shall provide financial support, time, and/or opportunities for
- 191 continuing education and professional development.
- 4.3.3 Minimum Continuing Education and Professional Development Requirements
- 193 **4.3.3.1** The minimum number of required CE units varies by position (see Annex B).
- 194 **4.3.3.2** Technicians shall obtain at least 1.5 CE units per calendar year relevant to their job duties,
- forensic toxicology, or other professional development in the field, with at least 0.25 CE units from
- 196 sources external to the laboratory.
- 4.3.3.3 Analysts shall obtain at least 2 CE units per calendar year relevant to forensic toxicology
- 198 with at least 0.5 CE units from sources external to the laboratory.
- 199 **4.3.3.4** Toxicologists and Toxicology Technical Leaders shall obtain at least 4 CE units per calendar
- year relevant to forensic toxicology, with 1 CE unit from sources external to the laboratory.
- 201 4.3.4 Sources of Continuing Education and Professional Development
- 202 **4.3.4.1** The laboratory shall define the activities that may be counted toward continuing education
- and professional development activities, the appropriate number of CE units assigned to each
- activity, the participation required to receive credit, and whether the activities are considered as
- internal or external training sources.
- 206 **4.3.4.2** Assigned CE units for commonly recognized sources of continuing education and
- professional development activities should be consistent with the following:
- 208 publishing scientific articles 5 CE units;

- 209 presenting at a conference 5 CE units;
- 210 presenting at a workshop 1 CE unit/contact hour;
- 211 performing a literature review 0.25 CE unit per article;
- 212 peer-reviewing a technical manuscript 1 CE unit per manuscript;
- 213 peer-reviewing a technical abstract 0.25 CE unit per abstract;
- formal mentoring students or other toxicologists 1 CE unit/contact hour (maximum of 5 CE
- 215 units per year);
- instruction of a seminar, lecture, or class 1 CE unit/contact hour;
- service on scientific committees and working groups 1 CE unit/year;
- attending seminars, lectures, professional meetings, and classes 0.25 CE unit/contact hour;
- 219 attending instrument operation or maintenance courses 0.25 CE unit/contact hour;
- 220 attending distributed learning:
- on-line education 0.25 CE unit/contact hour,
- webinars 0.25 CE unit/contact hour;
- 223 participating in independent learning 0.25 CE unit/contact hour;
- 224 performing laboratory inspections (audits, assessments) 5 CE hours per inspection.
- NOTE: If an individual is certified (see Section 4.4) or licensed, the certification or licensing body has the
- authority to assign different CE units for the above activities.
- 4.3.5 Components of Continuing Education and Professional Development Activities
- 228 **4.3.5.1** Laboratories shall ensure that continuing education and professional development
- activities are structured by including the following components, as applicable:
- 230 written goals and objectives for the activity;
- 231 the use of subject matter expert instructors; and
- 232 written syllabus or program description.
- **4.3.5.2** Laboratories shall establish an assessment mechanism to ensure that the outcomes of
- continuing education and professional development activities are measurable.
- NOTE: Assessment mechanisms may include oral or written examinations, time spent on a training activity,
- instructor or presenter evaluation, an oral or written summary of what was learned from a training activity,
- practical exercises, observation of technical performance, and criteria for passing tests.

<b>4.4</b>	Certification
------------	---------------

- 239 **4.4.1** Certification provides the public and the judicial system with a means of identifying
- practitioners who possess the education and knowledge appropriate for their field. Certifying bodies
- also provide guidance for professional conduct and ethical behavior.
- **4.4.2** Analysts and toxicologists should obtain certification commensurate with job duties.
- **4.4.3** Toxicology Technical Leaders shall obtain relevant certification within three (3) years of
- their appointment to the position or a laboratory's adoption of this standard.
- NOTE: These minimum standards for certification are summarized in Annex B for each employment category.
- **4.4.4** An acceptable certification program is one that:
- 247 is accredited under ISO/IEC 17024;
- 248 has a formal application process;
- 249 verifies minimum educational qualifications;
- 250 reviews official transcript(s) from accredited colleges or universities that are sent directly to the
- certification body;
- 252 reviews professional references from practitioners with knowledge of the applicant's experience
- in forensic toxicology submitted directly to the certification body;
- 254 verifies required training and experience;
- 255 requires a statement of adherence to a professional code of conduct and ethical behavior;
- 256 performs a proctored written examination appropriate to the level of certification and
- 257 predefines criteria for successful completion;
- 258 has a periodic requalification process and a process to reapply for certification if an individual
- does not qualify.
- 5 Documentation of Training, Competency, Continuing Education, Professional
- 261 **Development, and Certification**
- 262 **5.1 General**
- The laboratory shall have a policy to maintain records of employees' training, competency,
- 264 continuing education, professional development, and certification.
- 265 **5.2 Documentation of Training**
- 266 **5.2.1** Records that demonstrate an employee's completion of the requirements of the laboratory's
- training elements or program (Section 4.2.2.1) shall permanently be maintained unless superseded
- by state statute, regulation, or law.

269 **5.2.2** Appropriate documentation of training shall include: — records showing progress through and completion of training modules (e.g., checklists, grids); 270 — results of assessments (including initial competency tests (section 4.2.2.4) of trainee's 271 272 knowledge, skills, and abilities); 273 — Laboratory authorization for employee to perform activities affecting casework or breath alcohol instrument calibrations (e.g., memorandum). 274 275 5.3 Documentation of Ongoing Competency Records demonstrating an employee's completion of ongoing competency activities (section 276 277 4.2.3) shall be maintained for at least seven years unless superseded by state statute, regulation, or law. 278 279 Appropriate documentation of ongoing competency shall include: 5.3.2 280 records of the activities used to monitor the competency of employees (e.g., specific proficiency tests); 281 — results and assessment of the competency activities; 282 283 — remediation when the expected outcome is not achieved. 5.4 Documentation of Continuing Education and Professional Development 284 **5.4.1** Continuing education and professional development shall be documented to count toward 285 the minimum number of required CE units listed in 4.3.2. and Annex B. 286 287 NOTE: Examples of appropriate documentation of continuing education and professional development activities include: 288 289 — verification of attendance: 290 certificates of completion: 291 — date: 292 — location; 293 duration of training; 294 — instructor: 295 sponsoring organization; — title of event; 296 297 — virtual (online) or in-person; 298 scientific conference agenda; 299 workshop agenda and learning objectives 300 — course syllabus; 301 abstract of provided scientific presentation (e.g., oral or poster);

302 — copy of published manuscript (e.g., peer-reviewed article, white paper, application note); 303 — copy of continuing education credits awarded for review of manuscripts (e.g., Journal of Analytical 304 Toxicology); 305 — recording of presentation, webinar, or exercise; — number of contact hours for training activities. 306 307 **5.4.2** Continuing education and professional development activities shall be independently verifiable to meet the minimum requirements defined in Annex B. 308 **5.4.3** In the absence of objective evidence of these activities (e.g., self-directed literature reviews), 309 the laboratory shall define a mechanism to verify completion. 310 **5.4.4** Records of completion of continuing education and professional development activities 311 (Section 4.3) shall be maintained for a minimum of seven years, unless superseded by state statute, 312 regulation, or law. 313 314 5.5 Documentation of Certification **5.5.1** Documentation of an employee's certification shall include a copy of a certificate, letter, or 315 316 card from the certifying body that specifies: 317 — name of certificant: 318 — certificate number; 319 — name of certifying body; 320 — certification category;

321

322

323

— date certification was granted;

expiration date of certification.

# Annex A (normative)

326

### **Training Elements and Content**

Element	Training Content	
Administrative and Laboratory Policies	accreditation; document and record control; quality management; safety (e.g., biological, chemical, and physical hazards); security; standard operating procedures	
Alcohol Toxicology	interpretation (e.g., ANSI/ASB BPR 122, Best Practice Recommendation for Performing Alcohol Calculations in Forensic Toxicology); pharmacodynamics; pharmacokinetics; physiology (e.g., blood-to-breath ratio)	
Analytical Methodology	aliquoting; isolation techniques; qualitative analysis; quantitative analysis; requirements for identification (e.g., ANSI/ASB Std 113, Standard for Identification Criteria in Forensic Toxicology); theory	
Calibrating Device	dry gas cylinder (e.g., barometric pressure; theory; uses/limitations; wet/dry offset); wet bath simulator (e.g., partition ratio; temperature; theory; uses/limitations)	
Communication	report writing (e.g., ANSI/ASB Std 053, Standard for Report Content in Forensic Toxicology); verbal and nonverbal skills (e.g., non-technical; technical)	
Evidence	chain of custody; collection; concepts; preservation; retention	
Forensic Science	general knowledge; related disciplines	
Human Factors	factors such as cognitive bias that may affect testing strategies, interpretations, reporting, and testimony; understanding the scope and limitations of methods and expertise	
Instrumentation	theory; operation; limitations; maintenance; adjustments; calibrations (e.g., ANSI/ASB Std 055, Standard for Breath Alcohol Measuring Instrument Calibration); troubleshooting; mass spectrometry (e.g., ANSI/ASB Std 098, Standard for Mass Spectral Analysis in Forensic Toxicology)	
Legal Aspects	case law and applicable federal, state, or local laws and regulations; terminology; courtroom procedures; deposition and courtroom testimonies (e.g., ANSI/ASB Std 037, Guidelines for Opinions and Testimony in Forensic Toxicology); admissibility (e.g., Daubert, Frye); disclosure obligations (e.g., Brady); confrontation (e.g., Melendez-Diaz vs Massachusetts; Bullcoming vs New Mexico; and Smith vs Arizona)	
Quality Assurance and Quality Control	ANSI/ASB Std 054, Standard for a Quality Control Program in Forensic Toxicology Laboratories; Method development and validation (e.g., ANSI/ASB Std 036, Standard Practices for Method Validation in Forensic Toxicology); metrological traceability (e.g., ANSI/ASB Std 017, Standard Practices for Metrological Traceability in Forensic Toxicology); reference material (e.g., uses/limitations; preparation); theory	

Element	Training Content	
Standards of Conduct	ethics; professionalism; confidentiality	
Statistical Analysis	calculations; control charts and/or trending; measurement uncertainty (e.g., ANSI/ASB Std 056, Standard for Evaluation of Measurement Uncertainty in Forensic Toxicology); terminology	
Toxicology	interpretation; pharmacodynamics; pharmacokinetics; physiology	

# Annex B (normative)

## **Personnel Requirements Listed by Position**

	Technician*	Analyst*	Toxicologist*	Toxicology Technical Leader*
Scope	Individual who performs basic analytical duties but does not evaluate and interpret observations and calculations. Technicians may also perform instrumentation verification, adjustment, and calibration duties. They may be named in reports to indicate their contribution to the work.	Individual who conducts, directs, or reviews the analysis of forensic toxicology samples and/or breath alcohol instrument calibration activities. Analysts evaluate and interpret observations and calculations and may sign a report for court or investigative purposes. The analyst may testify but does not provide opinions. Duties and responsibilities may include those of a technician.	Individual who provides factual information, interpretations, and opinions related to the results of toxicological tests for court or investigative purposes. Duties and responsibilities may also include those of an analyst.	Individual who is responsible for the technical oversight of the toxicology and/or breath alcohol calibration laboratory. Duties and responsibilities may also include those of a toxicologist.
Education	Associate's degree in Natural Science, Applied Science, or Technology or equivalent number of semester hours	Bachelor's degree in Natural Science (Preference in Chemistry, Toxicology, Biochemistry, Pharmacology, or Biology) or Applied Science (Forensic Science, Medical Sciences)	Bachelor's degree in Natural Science (Preference in Chemistry, Toxicology, Biochemistry, Pharmacology, or Biology) or Applied Science (Forensic Science, Medical Sciences)	Bachelor's degree in Natural Science (Preference in Chemistry, Toxicology, Biochemistry, Pharmacology, or Biology) or Applied Science (Forensic Science, Medical Sciences)
Required Courses	None required		General & organic chemistry with associated laboratory courses, one analytical course, and one interpretive course or workshop	General & organic chemistry with associated laboratory courses, one analytical course, and one interpretive course or workshop
Training and Experience	Completion of formal, structured training program appropriate to job duties	Completion of formal, structured training program appropriate to job duties	Completion of formal, structured training program appropriate to job duties	3 years of experience performing independently as a <i>Toxicologist</i>
Certification	Not required	Recommended	Recommended	Required within 3 years of appointment to the position
Continuing Education	o I ion diffice with II /5 limite from I i i		Sufficient to maintain certification or 4 units per calendar year relevant to forensic toxicology with 1 unit from external source(s)	Sufficient to maintain certification or 4 units per calendar year relevant to forensic toxicology with 1 unit from external source(s)

<sup>\*</sup>An individual (however named) who fulfills scope.
