

Deadline of Submission of Comments: 23-Dec-24

Document Number: ANSI/ASB Std 216

Document Title: Standard for Construction of Multilocus Databases

Comment #	Text Line # (s)	Document Section	Type of Comment	Current Document Wording	Proposed Revision	Revision Justification	For Working Group and Consensus Body use only, not to be completed by commenter.
			E-Editorial T-Technical				Final Resolution
1		Foreword	E	Analysts may use their expert knowledge	"Analysts must use their expert knowledge" or just "Analysts use their..."	Seems like using expert knowledge isn't optional	Accept
2	6	Scope	E	"evaluation of the reference database"	decide whether "database" or "databases"	The rest of the paragraph refers to databases (plural), but here it is singular	Accept. The CB has reviewed all occurrences of "database" and "databases" and has updated all of them to the correct format for each occurrence.
3	59-60	4.1.1	T	...procedures for statistical analysis, and evaluation and interpretation of results for <u>general population genetic analyses</u> .	possibly end sentence after "and statistical analysis"	I don't read this standard as applying to "interpretation of results for general population genetic analyses"	Accept for clarification of the paragraph.
4	68	4.2.1b	E	"establishment of parameters for inclusion samples"	"establishment of parameters for inclusion of samples"	needs an "of"	Accept
5	87	4.2.4e	E	i.e.	do you mean e.g. instead of i.e.?	if i.e., I read this to be a list of the collector info I have to have (I guess it's softened by "if known."). But if it's e.g., as in the bullet above, it's an example but not the be-all, end-all list of collector's information	Reject, i.e is correct for minimum standard
6				Ballot Comment	I agree with all the contents according to my current knowledge in Molecular Biology, Wildlife identification and Forensics. Thank you for the work.		Noted.
7				Ballot Comment	I am abstaining as I am new to the CB and do not feel I can make an informed vote.		Noted.
